YATES INDUSTRIES— POWERING TECHNOLOGY

St. Clair Shores, MI – Manufacturers of simulation technology equipment depend on Yates Industries to provide them with reliable high performance cylinders.

Across the country, from the Marine Air Station in Miramar, California, to the casinos of Las Vegas, to Walt Disney World in Orlando, Florida, to the earthquake engineering test lab at the Leigh University in Bethlehem, Pennsylvania, simulation technology is at work helping educate, entertain, explore or train millions of people.

on the wings – is historic proof of the value of realistic training with simulation equipment.

Reliable hydraulic and pneumatic cylinders that work at peak performance repeatedly without fail are critical to providing safety and realism.

If you're one of the 135 million people¹ who visited an amusement or theme park in 2009 and stood in long lines with a multitude of other people, then you can well imagine how many thousands of times the rides or exhibits operate daily.

The manufacturers of simulation equipment have come to depend on Yates Industries' over 35 years of experience and a relentless dedication to producing quality cylinders. The company's cylinders deliver a strong value at competitive prices – outperform other units – and are backed by an industry leading warranty. Yates Industries is committed to delivering – the right product – on time – every time.

The company also offers 24-hour emergency service, pick-up and delivery service, design and engineering service and field application service. In addition, Yates Industries maintains the largest most complete repair facility in the Midwest. They warehouse a huge inventory of tubing, rod stock, cold rolled bar, and seals both standard and metric, enabling them to build and repair cylinders immediately. An ISO 9001:2008 certified company.
